

TAVRON
Engineers

...Think cool

Profile

The Company

We would like to introduce **TAVRON ENGINEERS** as a professionally managed company with ISO 9001-2008 CERTIFIED started by the promoters whose bio data is enclosed vide separate annexure.

The company has been formed by the ambitious promoters having certain concept in mind to contribute towards the development of equipment for food, beverages and dairy industry and engineering products particularly having the nature of import substitution. The company has the excellent growth rate.

The company has developed the products like plate type heat exchangers, centrifugal pumps, evaporators, spray drying plants which are indigenous. The company has installed required plant and machinery for such research and development work and have produced the necessary infrastructure. The equipment manufactured by the company are at par with those manufactured by the multinationals, who are having control in the market.

The company has executed many Milk Processing Plant, Milk Conversion Plant, Ice Cream Manufacturing, Yogurt manufacturing unit, Fruit Pulp unit, Tube-in-Tube Fruit Pulp Heater, Direct Expansion Milk Cooler, Plate Heat Exchanger and SS Centrifugal Pump.

The company has Established Complete Skim milk Powder plant for M/s A R Dairy Pvt Ltd, Dindugal of Capacity 5 Ton – Day including the Triple Effect Evaporator along with Two stage Drying.

The company also established 10 Ton – Day Powder Plant to M/s Shruthi Milk Product Pvt Ltd, Chittoor of Capacity 10 Ton – Day including the Triple Effect Evaporator along with Two stage Drying.

The company has Established of Four Effect Evaporator of Cap 6000 LPH to M/s Mahalakshmi Dairy, Coimbatore along with Double Effect Evaporator of Cap 1500 LPH to M/s Saravana Foods Pvt Ltd and M/s Winner Dairy Pvt Ltd.

The company is Establishing the Evaporator and Dryer for the Whey Product to M/s Dindugal Dairy Famrs Pvt Ltd.

The company has Established Evaporator of Falling Film and Force circulation Evaporation to Concentrate the RO Reject in Effluent Treatment plant of 16 No to M/s Windsor Satyam Ltd, Chennai.

The company is Manufacturing the Single Section and Multi section plate heat Exchanger and the Plate heat exchanger system (Pasteurizer) using the Imported Plates. The company has made the Pasteurizer from 250 LPH to 20000 LPH and exported to many countries.

The company has supplied the Fruit Line including the Equipment like Primary washer, Secondary Washer, Inspection conveyors, Tube-in Tube Pre heaters and Storage vessels.

The company is manufacturing the Bulk Milk Cooler using the Laser welded Dimple Jacket Evaporator Plate from Cap 250 L to 10000 L.

The company is supplying around 500 No SS Centrifugal pumps every year from 0.5 HP to 20 HP.

Activities

TURN KEY PROJECTS

- Milk Processing Plants
- By products manufacturing like milk powder, panneer, cream, butter, ghee, cheese.
- Fruit juice and pulp manufacturing.
- Ice cream manufacturing.
- Equipment's for breweries and soft drinks plants.
- Whey Processing Plant
- Refrigeration and Cold store plants for above industries.
- Equipment for making Skim milk powder, whole milk powder, Condensed milk, Evaporated milk etc.

Products

PRODUCTS

- Plate Heat Exchangers for milk, fruit juice, breweries, water and chemicals.
- Falling Film evaporators.
- Bulk Milk Coolers
- Spray dryers.
- Centrifugal Pumps for various applications.
- Various types tanks for milk breweries and beverage industries.
- Tubular Heat Exchanger
- Force Circulation Evaporator
- Dimple / Limpet Jacketed Vessel

The Key People

S.D.SAMUEL

The graduate and Mechanical Engineer joined M/s. Heavy Vehicles Factory, Avadi for intensive training and was throughout his career was involved in the marketing of various industrial products. The ranges of various products handled by him were from the sophisticated equipment to the company used items.

He was represented M/s Jektron Engineers Pvt Ltd, Pune and improved their sales up to 500 Lakhs / annum. He received and executed many project for Jektron. Some of them are Triple Effect Evaporator for M/s parry Confectionery, 100000 LPD Milk Processing plant for Srivilliputhur Dairy.

During his career he was involved in the product as well as project sales. He was instrumental in raising the turnover of the JEKTRON.

Now he is started the Company M/s TAVRON ENGINEERS and the activity has briefed earlier along with manufacturing various types of SS Centrifugal pump, semi welded plate heat exchanger.

SUBRAMANI

The Technician completed his skill in Welding Technology with IBR certification has executed many project for the Multinational Companies.

He was erecting medium to large capacity Evaporator and Spray drying plant for the above companies for their various products including milk and milk product.

Now he has joined with M/s Tavron Engineers as partner and taking care of the factory with good man and material management.

SHARAD BASA

The Dairy Engineering Consultant completed his Degree in Dairy Technology has been associated with Tavron for the Process Engineering and smooth handing over the Plant to the customer technical expectation. He was Instrumental in raising the turnover of M/s Hatsun Foods Ltd and M/s Saravana Foods Pvt Ltd.

We design, manufacture, supply and install milk processing plants to meet customer requirement from milk reception to final end products.

1. MILK RECEPTION SECTION

Milk reception in tankers, cans, milk weighing equipment mechanical or electronic, can conveying system, can washer, can scrubbers, milk receiving tanks, milk pumps, chillers, and raw milk storage tanks etc.,

2. MILK PROCESSING SECTION

HTST type pasteurizer, with automatic / semi automatic control system for milk heating and chilling with re-generation efficiency up to 90% for energy saving, pasteurizer also provided with heating system with direct steam hot water.

3. STORAGE AND PACKING:

Pasteurized / Chilled milk storage, pumping, pouch filling system cold rooms to store milk.

4. SPRAY DRYER AND FLUID BED DRYER:

5. FALLING FILM EVAPORATOR:

6. AXILLARY:

We design and supply Freon / ammonia based refrigeration system, Glycol system and cold store system.

We also design and supply boilers with accessories, hot water boilers with accessories, complete refrigeration systems for milk processing by product manufacturing etc.,

7. BY PRODUCT MANUFACTURING:

We design and supply various equipments for manufacturing powder, ghee cream paneer, butter, cheese.

We supply equipments like ghee boilers, cheese vats, settling tanks butter churn, cream separators etc.,

8. FRUIT JUICE AND PULP MANUFACTURING:

Complete plant for manufacturing fruit juice and pulp puree, etc., for various fruits like tomato, mango, pineapple etc.,

9. ICE CREAM MANUFACTURING:

We design manufacturing and supply various equipment for ice cream manufacturing on turn key basis. We also supply equipments like pasteurisers for ice cream mix, ice cream mixing vat aging vats, refrigeration system, cold store ventury and funnel for mixing powder butter.

10. BREWERIES:

We supply equipment like plate heat exchanger for wort and beer. Cooling pumps for various applications, fermentor, vessels, lager vessel, mash kettle, yeast kettle and vats.

11. CIP SYSTEM:

We supply the complete CIP system to suit the standard dairy and brewery washing. These CIP system can be supplied with manual system, auto system with PLC control.

12. MATERIAL HANDLING :

We supply Power / Roller conveyor, elevators for various food products.

Products

1. Our product range consists of centrifugal pump of various capacities with single and double mechanical seal arrangements. Double mechanical pumps are suitable for working against vacuum.
2. Tanks and vessels fabricated out of SS 304 and 316 for different products like milk, cream, beverages etc.,
3. Bulk milk Cooler of DX type with the Evaporation plate of Laser welded technology. The Capacity from 300 L to 10,000 L
4. Plate type heat exchangers for various products like milk, cream, food products, ice cream mix, fruit juices, water, beverages etc., We can offer plates of different sizes, material of construction for plates SS 304 and 316.
5. Falling film evaporators of various size and capacities working under vacuum evaporating products like milk, chemical products etc.,,
6. Force Circulation Evaporators for various viscous and scaling product. Material of construction SS 304 / SS 316
7. Spray dryers: Spray drying plants for drying products like, milk, gum arabic chemicals and other products. Spray dryers are designed to meet the ultimate products properties.

PROJECT MANAGEMENT

- Unloading
- Material Handling
- Storage Indoor
- Material control and issues
- Erection procedure
- Erection control
- Progress report
- Cost documents
- Quality procedures
- Liaison with sub-contractors
- Liaison with customers
- Record maintenance
- Trial runs
- Handing over documents
- Management information system to:
 - Head Office
 - Regional Office
 - Customers
